Justin,

Thanks for that!

Good call on the State angle—I will tweak text.

Congrats by the way on your new position—a great development for you and the EPA!

Gary

Hi Gary,

I just put our product description on the Sharepoint document. I borrowed some of your language in the lower sections, but we can change that if needed.

Subject: Next "Homework" Task-Almost There!

Hi everyone,

Thanks for providing all the proposed products to AOP8. We had a RACT Team call last week and worked through almost 200 products that had been submitted thus far for the seven AOP Output areas, and are onto the next required steps.

The original plan through the NPD office was to have a half page description for each product, but with this many products that doesn't really seem like a workable approach. Consequently the current plan is to group the products into related "clusters" (by topic area and/or research team) and do a half-page write-up for each of these clusters, which describes the overall work including brief descriptions of the content of the "original" products (i.e., the journal articles you provided).

A couple of you—Mary and Justin/Earl already have a head start on this step, as your original submissions actually were more of an integrated project description encompassing multiple products, so the three of you won't have a ton of new writing here.

At the bottom of this email I have broken the submitted AOP8 products into seven logical clusters/groups (note there are two of these that track to a single journal article—the submissions from Jon Haselman and Adam Biales). And, I have listed who I think the leads likely are for doing this next write-up—but, those certainly are not set in stone—each cluster group can work that out as they like!

Also—to hopefully help you all out with an example—I have attached what I put together describing the first cluster listed below. While we have received no specific guidance, this seemed like a reasonable summary (to me).

So, the next steps specifically:

- Attached is a word doc version of the product description portion of the Research Area Template you can download to populate
- Be sure to populate all the lines to the best of your ability and remember the product/combined product description should not exceed a ½ page
- Please cut and paste your completed descriptions into this [Sharepoint Version of the AOP8 Research Area Template](#) (linked) by **5/23** at 9 AM (Eastern)
- **Note**, the linked Sharepoint site also has an overall Output write-up for AOP8 that I put together for the entire group; if you have the time/inclination to look at and send me comments on that piece it can certainly be changed—I just wanted to get something into the system for everyone

As always, thanks for your help. Please feel free to call/email if you have questions and I will do my best to answer.

Gary
